### Informed Consent -

Any health care is not without its risks or is guaranteed to be successful. Naturopathic care is generally safer than other systems of medicine, but there are potential risks in what we do as well.

[By reading and initialing below, you acknowledge your awareness and understanding of such risks.](#)

1. The Salmon Creek Clinic, the physicians practicing within, and clinical staff do not recommend that you discontinue any other treatment or care provided by any other health care professional.

Initials \_\_\_\_\_

2. There is no expressed or implied guarantee of any specific outcome with your treatment provided by the physicians of the Salmon Creek Clinic or staff. The care provided may or may not be a treatment for a specific disease, and may be preventive in nature, designed to improve your overall health and well-being.

Initials \_\_\_\_\_

3. The Salmon Creek Clinic physicians and staff will always strive to provide full disclosure of all information relevant to a person’s care, and to answer all questions a patient may have, to the patient’s satisfaction. The better one understands, the more fully one can participate in one’s own healing. We encourage all questions regarding any aspect of care. Please feel free to ask about any aspect of care, future care, expected outcome, and what to do if any difficulties or possible negative outcomes should arise.

4. Acupuncture treatments may result in a bruise at the site of the needle insertion. Any needle insertion carries a small risk of infection, though we use only single-use, sterile needles to minimize any risk.

Initials \_\_\_\_\_

5. Natural healing may occasionally generate a “healing reaction.” All new patients receive a paper, which discusses this, *Nature’s Cure and the Process of Healing*. Generally, this will be a flu-like state with fever for a few days, but may be different from that, and may require expert attention and guidance to the next stage of healing.
